

A rational expression is

$$\frac{3n^3 - 12n^2 - 180n}{8n^3 + 64n^2 + 96n}$$

To add or subtract,

$$\frac{5}{3} - \frac{m+5}{15m+18}$$

$$\frac{2}{5n-2} - \frac{n+2}{n-2}$$

$$\frac{6r}{2r-4} - \frac{3}{r-2}$$

$$\frac{3x}{x+3} - \frac{3}{x+1}$$

$$2 + \frac{2n}{6n+6}$$

$$\frac{x-4}{2x+10} + \frac{x-2}{3}$$

$$\frac{2}{n-2} + \frac{3}{n+1}$$
