

Sketch the graph of each line.

1) $0 = -1 + \frac{1}{5}y + \frac{4}{5}x$

2) $\frac{1}{2}y = 1 + \frac{1}{4}x$

3) $-10 + 2y = 3x$

4) $6 = 6y + 4x$

5) $-4 + y - 3x = 0$

6) $x - \frac{5}{3}y = -\frac{10}{3}$

7) $4x + 5y = -25$

8) $3x - \frac{12}{7}y + \frac{36}{7} = 0$

$$9) -y + \frac{5}{3}x = 2$$

$$10) 15 + x + 3y = 0$$

$$11) -3 + \frac{3}{20}x - \frac{3}{4}y = 0$$

$$12) 8 = 2x + 4y$$
