Daily Work for volume of a sphere 02

Numeric Response

- 1. A sphere has a volume of 1046.86344 cubic centimeters. How many centimeters is its radius? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3}\pi r^3$.
- 2. A sphere has a volume of 1203.64992 cubic feet. How many feet is its radius? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3}\pi r^3$.
- 3. A sphere has a volume of 5725.81512 cubic centimeters. How many centimeters is its diameter? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3}\pi r^3$.
- 4. A sphere has a volume of 2224.96632 cubic centimeters. How many centimeters is its radius? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3} \pi r^3$.
- 5. A sphere has a volume of 1766.25 cubic inches. How many inches is its diameter? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3} \pi r^3$.

- 6. A sphere has a volume of 904.32 cubic centimeters. How many centimeters is its diameter? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3} \pi r^3$.
- 7. A sphere has a volume of 4846.59 cubic feet. How many feet is its radius? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3}\pi r^3$.
- 8. A sphere has a volume of 904.32 cubic inches. How many inches is its radius? Use 3.14 as an approximate value for pi. The volume formula for a sphere is: $V = \frac{4}{3}\pi r^3$.
